

HealthXcelerate

THE INSIDER'S GUIDE TO HEALTH CARE

Developed by Harvard Medical School (HMS), HealthXcelerate provides a comprehensive and patient-centric understanding of the U.S. health care system to empower professionals and organizations to meet their career and market goals.

Social Determinants of Health

Examine how social determinants shape health outcomes for individuals and communities. This course will delve into various social, economic, and environmental factors that impact health disparities and inequalities. You will review evidence-based interventions and strategies to address social determinants and health disparities, foster health equity, and enhance population health.

Learning objectives

During the Social Determinants of Health course, you will:

- » Identify the impact of social determinants of health on health outcomes
- » Analyze how disparities in socioeconomic status and education influence health outcomes
- » Analyze variations in social determinants of health between the U.S. and other countries
- » Evaluate interventions aimed at addressing social determinants of health and reducing health inequalities
